

Boats, Balloons and Classroom video: Science Teaching as Inquiry

Ann S. Rosebery, and Beth Warren, (Eds.)

—(1998) Portsmouth: Heinemann.

Summary

Boats, Balloons, and Classroom Video lets you take part in a unique professional development experience in which a group of teachers collaborated with educational researchers and scientists to conduct their own scientific investigations and to explore their students' learning in the classroom. This book describes some of the important discoveries these teachers made "doing" science for themselves and the profound effect this kind of experience had on their teaching practice.
