

Education Research Collaborative

The Education Research Collaborative (ERC) is devoted to research on math and science learning and the research-based development of curricula, learning tools, and staff development models. Major areas of work include elementary mathematics; research on language, culture and science learning; adult numeracy; math learning out of school; and statistical reasoning and data analysis. ERC houses the Adult Numeracy Center, the Chêche Konnen Center, the Mixing in Math series of initiatives, and the Investigations Implementation and Professional Development group.
