

Spanish Mixing in Math (MiM) IBM

Principal Investigator: [Marlene Kliman](#)

Funders: IBM/Work Family Directions

The Mixing in Math Group at TERC proposes to develop a set of Spanish-language webinars to support the implementation of Jugar y crear con las matemáticas.

TERC will deliver to WFD:

- Eight self-contained webinars, each approximately 15 minutes long.
- Eight Spanish-language PowerPoint (PPT) presentations aligned with the webinars. PPTs will be suitable for print.
- Spanish-language summary descriptions of each webinar for host website, and concise "how to use" information.

TERC will record and present the webinars, provide the recordings to WFD, and provide the PPT presentations to WFD formatted for downloading and printing.
