

SJ Russell BWDIW

"Mathematically, the math argument routines position the operations as central. Students have developed the comfort and curiosity about what the operations mean and how these can be examined closely. It has now become routine for students on their own to bring up questions or observations about operations."

[GRADE 3 TEACHER]

n!

But Why Does It Work? offers a simple, efficient teaching model focused on mathematical argument for developing the ability of students to justify their thinking

and engage with the reasoning of others from authors Susan Jo Russell, Deborah Schifter, Virginia Bastable, Traci Higgins, Reva Kasman.
