## **Storybook STEM Resource Spreadsheet**

August 2020

The following resources were recommended by educators and researchers across the country as relevant to using storybooks to engage families with young children in STEM. These resources were identified through a national survey with 231 participants and a follow-up online discussion with 156 individuals from this group. These resources are provided as they were shared by others. The Storybook STEM project team, TERC, or University of Notre Dame do not endorse or guarantee the accuracy of this information. The resources have been loosely categorized by STEM topic, although many of the resources span multiple areas. Resources categorized as "literacy" relate to reading, early childhood literacy, or early childhood development more broadly. For more information about the Storybook STEM project, visit: https://www.terc.edu/storybookstem/.
